Job Title: Data Scientist

Company: Tech Innovators Inc.

Location: Remote / New York, NY

Job Type: Full-Time

About Us:
Tech Innovators Inc. is a leading AI-driven solutions provider, helping businesses leverage data to make informed decisions. Our mission is to create cutting-edge analytics solutions that drive business success.

Job Description:
We are looking for a Data Scientist to analyze large datasets, develop predictive models, and derive actionable insights. You will work with cross-functional teams to implement AI-driven solutions, optimize business processes, and contribute to product innovation.

Responsibilities:

Collect, clean, and analyze structured and unstructured data from various sources.

Develop machine learning models and predictive analytics to support business decisions.

Design and implement data-driven solutions to improve business efficiency.

Collaborate with engineers, analysts, and product managers to deploy scalable data science solutions.

Communicate findings through reports, dashboards, and visualizations.

Stay updated with industry trends and emerging technologies in data science and AI.

Required Skills & Qualifications:

Bachelor's or Master's degree in Computer Science, Data Science, Statistics, or a related field.

2+ years of experience in data science, machine learning, or AI.

Proficiency in Python and libraries like NumPy, Pandas, Scikit-learn, TensorFlow, or PyTorch.

Experience with SQL and data manipulation.

Strong understanding of statistical methods and machine learning techniques.

Experience with data visualization tools like Tableau, Power BI, or Matplotlib.

Excellent problem-solving and analytical skills.

Ability to work independently and in a team environment.

Preferred Qualifications:

Experience with cloud platforms (AWS, GCP, Azure).

Knowledge of NLP, deep learning, or reinforcement learning.

Experience with big data technologies (Hadoop, Spark, etc.)
